Issues for discussion

- ◆ **The legislative package no. 3, dedicated to the European internal market;**
- ◆ **The unequal development of national economies and their influence on energy markets.**
- ◆ **The European internal market for electricity: main targets**

- ◆ The European legislative framework dedicated to implementing the target model of the internal electricity market (framework guidelines, codes of network).
- ◆ Intra-regional integration projects and inter-regional integration of electricity markets, from the perspective of creating the European internal market by the end of 2014.
- ◆ Particularities of instruments and market rules within the interconnected systems of electricity.
- ◆ The roles of the ability entities (ministry, regulating authorities, transmission and system operator, power exchanges) in the preparation and implementation of national framework and mechanisms, necessary for integration into the European internal market.
